50" Mirror PCAP Touch Screen
with Dual OS

Overview

Dual OS

The integrated PC has both Windows and Android operating systems installed. Seamlessly switch between the two for the most versatile touch screen solution on the market.

Mirror Finish

The perfect balance between reflection and transparency is achieved with a combination of the 450cdm² brightness commercial panel used and the specially treated glass.

Audio

The screen has two integrated speakers but also has an audio out port for connecting headphones or external speakers.

Connectivity

If you don't want to use the screen's integrated PC you can attach your own device, such as a media player or high performance PC, using the HDMI or VGA inputs.

Portrait/ Landscape Orientation

The screen can be used in either a landscape or portrait orientation depending on your requirement.

10-Point PCAP Touch Technology

Using the most responsive and sensitive commercial touch technology available. Not affected by dust or debris on the screen surface.

Anti Fingerprint Glass

Thanks to a special plasma treatment the tempered glass front is more resistant to oil/ water residue left by fingerprint marks. Unlike other Touch Screens the glass is not etched, vastly improving the optical clarity.

USB Ports

Attach third party peripherals to the internal PC via the screens two USB ports.

IPS Panel

With 450cd/m² the IIPS panel shines brightly through the reflective mirror while delivering superior image quality and colour depth at 178° ultra wide viewing angle in both landscape and portrait orientations.

Smooth Touch Gestures

Perform smoother touch gestures with our specially treated glass which lowers the surface tension and friction of the touch surface. It is also more scratch resistant and durable than ever, making it ideal for commercial use.

LED Backlight

Improves brightness and contrast as well as improving their lifespan and reducing their power consumption. Unlike other forms of light this technology is mercury free; making it even more eco-friendly. The panel and backlight have a lifespan in excess of 50,000 hours.

Commercial Grade

Designed for use in commercial applications this screen can run 24/7. No external buttons or controls to avoid tampering.

Built in Wi-Fi

As well as having an Ethernet port you can wirelessly connect to the internet thanks to the built in Wi-Fi.

Create experiences for users to remember as they interact with the mirror!

Interactive Mirror

Add some magic to your Touch Screen with our Mirror PCAP Touch Screens. The stunning display is sure to create an impression on users as they interact with the mirror! Suitable for a wide range of applications from fitting rooms, retail stores, from hotels to parties the list of possibilities is endless with such a unique display like this. With a brightness of 450cd/m2 the screen is perfectly calibrated so content in white shine bright for users and areas left in black are reflective.

Dual OS

Experience the most versatile commercial touch screen on the market. With both Android and Windows operating systems installed on the integrated PC it cannot be beaten on flexibility. Seamlessly switch from your Windows desktop to the Android apps; this screen has it all in one convenient package. A Windows license will need to be purchased separately.

PCAP Touch

State of the art Projected Capacitive interactive technology offers the most responsive and sensitive touch experience available. Designed for commercial applications, PCAP touch technology works by fixing a sensor grid between a layer of cover glass/mirror and the LCD panel, when a finger touches the glass the grid detects the coordinates of the touch point. Unlike other touch technologies PCAP is not affected by dust or debris on the screen surface, allows for up to 10 touch points and offers superior optical quality.

Surface Plasma Treatment

Not only is the front glass face tempered, which makes it more durable and suitable for public use, but it is also plasma treated to give it an oleophobic coating. What this means is that it is more resistant to surface oil and moisture which reduces the residue left by fingerprints. It also lowers the surface tension and friction, making touch gestures much smoother, improving the overall tactile experience for the user. All this is achieved without having an etched finish which means that the overall optical clarity is maintained to the maximum level.

Features

10 Point Touch

Having up to 10 touch points allows for a wider variety of applications than ever before. This kind of functionality allows you to manipulate images, zoom in an out as well as perform many other touch gestures; much like you would with a domestic tablet. It also allows for multiple users interacting with the screen at one time.

LED Backlight

The LED backlight used is not only eco-friendly but also ensures the display has enhanced brightness and contrast. This technology increases the lifespan and reduces the power consumption by around 30%. This form of light technology is mercury free; safeguarding this screen's eco friendliness.

Attach External Devices

Although the screens have an integrated PC with two operating systems, there is also a possibility to attach external devices if required. Simply connect your device to the screen, via VGA or HDMI (for the video signal) and USB (for the touch functionality). The screen will then serve as your computer monitor and the touch functionality controls the cursor, essentially acting as your mouse.

24/7 Usage

Built with commercial grade panel and components these displays are designed to run 24/7 in constant use; unlike domestic tablets. The panel also has a lifespan of over 50,000 hours of continuous use. They can also be used in landscape or portrait orientation.

| | | |
|--------------------------|--|--|
| Panel | Display Size | 50 Inch |
| | Resolution | 1920x1080 |
| | Display Area (mm) | 1076x606 |
| | Aspect Ratio | 16:9 |
