

Complete Package Solution

We have combined a 24/7 commercial display, a network Android media player, and one year free CMS software for the ultimate package solution.

1st Year Free Software Subscription

The first year of using our cloud based CMS is absolutely free. You can also purchase 3 additional year's access at the point of purchase or make a one off payment to have access for life.

*Save time
and Money*

24/7 Commercial Use

These displays use a commercial grade LCD panel and LED backlight. They have the ability to be in constant use 24/7 for over 70,000 hours and have no external buttons or controls to avoid tampering.

Landscape or Portrait Orientation

Our displays can be used in either landscape or portrait orientation depending on your requirement and your brand's aesthetic in store.

350cd/m² IPS Panel

Commercial grade IPS technology accurately displays image quality and colour depth with no fall-off in colour accuracy. These panels are designed to achieve ultimate lifelike colour temperature when used in either landscape or portrait.

Update Instantly and From Anywhere

No special software installation or dedicated PC is required, simply login to our online your portal and update your screens from anywhere in the world with an internet connection.

Multi Screen Synchronisation

Create stunning content across multiple displays or just have your menus change at the same time.

Narrow Bezel

The slim border on the Digital Menu Boards allows your menu to take centre stage especially when multiple displays are placed side by side.

Power Timer

The eco-friendly power timer allows you to assign daily or weekly on and off times for your screen meaning that it is only in use when it needs to be; improving your environmental efficiency.

Wide Viewing Angle

Thanks to the IPS technology these displays provide fantastic image quality with a remarkable viewing angle of 178° in both landscape and portrait.

Menu Board Sync

Modernize the in store ordering experience with ease and increase transaction speed with Reddie's Menu Board Sync. Menu board sync means you can make updates to menu board items and prices in real time through your POS. Updating your menu offerings via the POS means it updates wherever the menu is displayed such as your digital drive thru, indoor menu boards, self-order kiosks, window signs etc. Reddie has Menu Board Sync integrations with over 50 established POS systems including Square, Clover, Revel, NCR Aloha, Lightspeed, PAR and Jumbilin.

*over 45 more!

Plug and Play Backup

If you lose your internet connection you can still update the screen using a USB stick to keep things simple.
