

**Complete Package Solution**

We have combined commercial display, a network Android media player, one year free CMS software **where you can upload and edit your layouts** for the ultimate package solution.

**Save time  
and Money**

**1st Year Free Software Subscription**

The first year of using our cloud based CMS is absolutely free. You can also purchase 3 additional year's access at the point of purchase or make a one off payment to have access for life.

**Commercial Use**

These displays use a commercial grade LCD panel and LED backlight. They have the ability to be in use for over 70,000 hours and have no external buttons or controls to avoid tampering.

**Portrait or Landscape Orientation**

Our displays can be used in either a landscape or portrait orientation depending on your requirement and your brand's in store aesthetic.

**700 nits IPS Panel**

Commercial grade IPS technology accurately displays image quality and colour depth with no fall-off in colour accuracy. These panels are designed to achieve ultimate lifelike colour temperature when used in either landscape or portrait.

**Update Instantly and From Anywhere**

No special software installation or dedicated PC is required, simply login to our online your portal and update your screens from anywhere in the world with an internet connection.

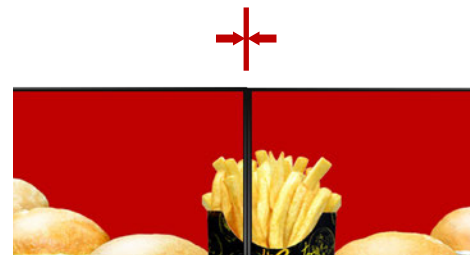

**Multi Screen Synchronisation**

Create stunning content across multiple displays or just have your menus change at the same time.

**Narrow Bezel**

The slim border on the Indoor Digital menu Board allows your menu to take center stage especially when multiple displays are placed side by side.

**Power Timer**

The eco-friendly power timer allows you to assign daily or weekly on and off times for your screen meaning that it is only in use when it needs to be; improving your environmental efficiency.

**Wide Viewing Angle**

Thanks to the IPS technology these displays provide fantastic image quality with a remarkable viewing angle of 178° in both landscape and portrait.

**Menu Board Sync**

Modernize the in store ordering experience with ease and increase transaction speed with Reddie's Menu Board Sync. Menu board sync means you can make updates to menu board items and prices in real time through your POS. Updating your menu offerings via the POS means it updates menu is displayed such as your digital drive thru, indoor self order kiosks, window signs etc. Reddie has Menu integrations with over 50 established POS systems including Square, Clover, Toast, Revel, NCR Aloha, Lightspeed, PAR and Jumbilin.

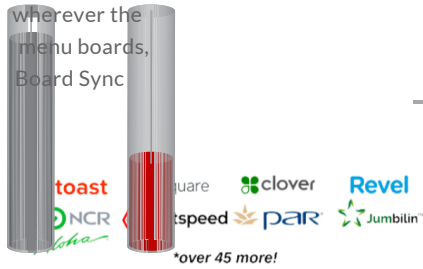

**Plug and Play Backup**

If you lose your internet connection you can still update the screen using a USB stick to keep things simple.
